

S8 Series

LOTTERY AND BETTING COUNTER TERMINAL

S8 is a comprehensive range of powerful, field-proven and user-friendly lottery and betting terminals. It can handle play slips and receipts using its embedded motorized scanner, and instant tickets with its barcode reader.

POWERFUL AND ROBUST

Powered by a fanless quad-core processor, S8 is a high-performance, multi-functional terminal. It is able to manage up to two independent display units – two with full-screen video – while scanning a play slip and printing a receipt.

S8 is designed for harsh environments ensuring a reliable usage over the years.

CUSTOMIZABLE

Lottery and betting organizations can customize their S8 terminals according to their exact needs, varying the size of displays for operators and customers alike, the size of the printer or the selection of peripheral devices.

USER-FRIENDLY

The large color touch screen offers the retailer a pleasant and efficient user interface while the motorized scanner has been designed with ergonomics in mind. In addition to this, the printer has an easy paper-loading feature.

S8 Series

Customer display

- › From 5" to 24" (or even larger) LCD display
- › Additional interfaces such as touch panel, barcode and card readers, webcam, etc.
- › Place on a pole or located at the back of the Terminal facing the Customer

Operator display

- › 10" or 15" LCD display
- › Pcap touch panel technology with multi-touch capabilities
