ToTe-M Series

SELF-SERVICE KIOSK

T hanks to ToTe-m, betting organizations can enhance their point of sale (POS) with multi-purpose kiosks, ideal to meet the new demands of players: a self-service, unified customer interface with other POS equipment using a "phygital" approach, also accepting various payment methods.

◈ IMPROVED CUSTOMER INTERACTION WITH MULTI-PURPOSE KIOSKS

Players will be able to prepare their sports betting and draw selection and even play directly on the self-service terminal in a very ergonomic and user-friendly manner. In addition to that, ToTe-m offers interactive services such as player account management and prize claiming options, as well as a variety of in-store games.

Lottery and betting organizations will value its extended functionalities: game instructions, draw results, sports betting odds and marketing information.
